1. System Overview

The Economic Intelligence Data Statistical Analysis App, designed for Android mobile devices, is an innovative tool offering dynamic statistics and analysis in the economic sector. It allows users to tailor their experience by selecting specific industry-related economic news, providing personalized content based on their preferences.

2. System Introduction

2.1 Login

Access the app by entering your username and password. New users can either register directly or use third-party platforms for authentication (refer to Fig. 1).

Figure 1.

2.2 Home Page

Discover the latest economic headlines and insights, both domestically and internationally, tailored to your interests (refer to Fig. 2).

Figure 2

2.2.1 Comment Feature

Engage with the community by viewing and adding comments on various economic topics (refer to Fig. 3).

Figure 3

2.2.2 Economic Information Categorization

Personalize your news feed by selecting preferred economic sectors, ensuring you receive the most relevant updates (refer to Fig. 4).

Figure 4

2.3 Live Economic News Broadcast

Stay updated with live broadcasts covering diverse economic sectors, offering more than just written content (refer to Fig. 5).

Figure 5

Watch and explore detailed overviews of each broadcast (refer to Fig. 6).

Figure 6

2.4 Video Library

Explore a variety of economic-related videos. Share these with others or on social media platforms (refer to Fig. 7).

取消分享

2.5 E-Daily Economic Newsletter Subscription

Subscribe to different economic e-dailies, curating a personalized stream of economic news (refer to Fig. 8).

2.6 Personal Center

Manage your profile, personalize settings, and access your saved articles for efficient information management (refer to Fig. 9).
